## PACKING FOR THE SLOPES

Now that you've planned where your ski trip[s], it's time to start packing! Packing for a ski vacation can be difficult - especially packing the mounds of gear and ski attire needed for a ski trip. Whether you're bringing your own equipment, or renting at the slopes, skiing is one sport that requires a lot of ancillary accessory items to pack for skiing or boarding.

Learn how you can make packing easier, and how to pack more efficiently from our guest speaker Rhonda Drew, manager at Capitol Luggage in the Towson town Center Mall. Rhonda has worked in the luggage industry for over 20 years.

There will be a drawing for a door prize donated by Capitol Luggage

**PRESIDENT'S MESSAGE**

By Mike Jones

As we ring in 2015, I hope everyone had safe and happy holidays. We ended 2014 on a high note. At the November Winter Expo we had a tremendous turn-out and raised \$300 for the Maryland School for the Blind (MSB) ski program from sales of 50/50 and door prize raffles. MSB also received numerous clothing donations. At the December holiday party \$100 was raised from our 50/50 raffle and ski poster sales and was donated to Ski4Life. Thanks to all of you who bought door prize and 50/50's raffle tickets to help our chosen charities.

The Club ski season will be starting soon. Many of the ski resorts have been open since Thanksgiving. Checking snow conditions at Whistler/Blackcomb, Mt. Bachelor, Winter Park and Snowmass all are reporting good snow conditions. Mt Bachelor leads the pack with a 71" base. The others are catching up with new snow for the holidays. In spite of the mild local weather, New England has been colder and receiving snow every week.

All of our western trips are all wait-listed. The Blue Ridge Ski Council destination for 2016 is Snowbird and Alta. All of the BRSC clubs will be staying at The Cliff Lodge and the BSC has reserved 21 rooms. The Cliff Lodge is a sophisticated, alpine hotel surrounded by the majestic Wasatch Mountains. This property combines ski-in/ski-out convenience and excellent service with a luxurious resort experience. There will be no expansion for this trip since all rooms in this hotel are reserved by the various clubs of the BRSC.

With the ski season approaching, check your gear to ensure that your bindings and skis are tuned up. Also consider updating your ski wardrobe. Please patronize our local ski shop sponsors.

Be sure to check your email for weekly Constant Contact messages to let you know when and where we will be skiing locally.

I am looking forward to the 2015 ski season and hope everyone has a safe and exciting ski and boarding season wherever you ski. I hope to see you on the slopes.

Mike

## Cross Country Skiing

Anyone interested in some cross country skiing? Anytime there are a few inches of snow locally (or a short drive away), I enjoy getting out the 'skinny skis' on the NCR trail or a park. There is nothing like a sunny winter day enjoying the outdoors with no crowds. Some think this is 'a lot of work' but it's really whatever you want – a light workout or a marathon. If you have equipment and would like an email if conditions are right, please contact me.

As the old joke goes, "If your nose runs, and your feet smell, you're built upside down!" Kidding aside, there are many reasons we get runny noses — technically known as rhinorrhea.

It's not something any of us enjoy but skier's nose is that condition where our nose starts running like a faucet once we hit the slopes. Sneezing and itchiness can also start kicking in. It happens even more often in people from out of town. If these sound like allergy symptoms it's because they are. The condition is called cold induced rhinorrhea which means allergic symptoms related to the cold weather. Although it's not an allergy like most of us think of, its symptoms are very similar. Mix that in with exercise induced rhinorrhea, or allergy symptoms due to exerting ourselves and you have a day of nose blowing and sneezing.

Our noses warm and humidify — add moisture to — the air we breathe as it travels down into the lungs. So when you inhale cold, dry air, the moist tissue inside the nose automatically increases fluid production to do its job of protecting sensitive lung tissue. Cold temperatures can also cause the small water droplets inside the moist nose to join together, forming big, heavy drops of water that can drip from your nostrils.

The best way to keep your nose normal in the cold? Cover your mouth and nose with your neck gaiter. The air that you breathe in through the material will be warmer and moister so your nose doesn't have to do as much work. Other treatments include taking over the counter allergy medications before hitting the slopes. If conditions are really bad prescription nasal sprays might be needed. One of the most effective drugs for this condition, ipratropium bromidenasal spray, has been used in Europe and is now available by prescription in the United States. As for the nose bleed part of visiting Colorado, this is mainly due to our dry climate. Nasal saline rinse/sprays during the day and humidifiers at night can help keep that from happening. (Editor's Note: using a saline nasogel applied with a cotton swab can also help) ALWAYS CHECK WITH YOUR DOCTOR.
